Attachment to Preliminary Amendment dated May 13, 2002  
Marked Copy - Paragraph at Page 2, line 10

It is the primary object of the present invention [is] to enable people to utilize tissues in wet and moist areas of the bathroom in which nasal passages are more easily cleaned of mucus, other bodily fluids and secretions, and other bodily substances such as makeup. Another object of the invention is to permit people, especially those with allergies, to take advantage of the moist environments of the bathroom to permit clearing of their nasal passages when they are more susceptible to such clearings. Another object of the invention is to make the disposal of used tissue easier by including a disposal device which permits easy and convenient disposal of used tissues by the person.

Marked Copy - Paragraph bridging Pages 5- 6

The dispenser 10 preferably is provided with a pressure sensitive, water resistant adhesive or tape 50 to enable the dispenser 10 to be secured to a wall or like. However, it should be understood that other fastening techniques may be employed as well such as, for example, a sliding eyelet and bolt fastening apparatus allowing the dispensers to be removably secured to a supporting wall or structure or suspending the dispenser 10 over a shower spray head using an elongated element such as a cord or rope.
